

Planning healthy meals

Making healthy food choices

- Lots of nonstarchy vegetables
- Whole-grain foods
- Fish 2 to 3 times a week
- Lean cuts of beef and pork
- Remove skin from chicken and turkey
- Non-fat or low-fat dairy products
- Water, unsweetened tea, coffee, and calorie-free “diet” drinks instead of drinks with sugar
- Liquid oils for cooking instead of solid fats
 - Limit quantities

Ask your diabetes care team how many fruits a day are right for your meal plan

Diabetes and healthy eating

- Good diabetes self-care means following your meal plan and keeping track of what you eat and drink
- Eat a variety of foods in the right amounts
- Be sure to check food labels for calorie, carbohydrate, total fat, and sodium amounts
- Eat regularly (small portions several times a day)
- Match how much you eat with your activity level
- Eat fewer foods high in calories, cholesterol, saturated fat, *trans* fat, and sodium
- Talk with your diabetes care team if you have any questions about your meal plan

“It took some time but I made the decision to do the things I needed to do to manage my diabetes. I started exercising and thinking more carefully about my food choices. Before too long, I had gained a lot of confidence in my ability to manage this disease.”

– Karen R., South Carolina

Estimating portion sizes

When you can't measure, you can estimate!

A fist equals about 1 cup

A palm equals about 3 ounces

A thumb equals about 1 ounce

These are only general guides.

Finding the carb counts: Reading Nutrition Facts labels

Check serving size. Information on the label is based on 1 serving. Keep in mind that packages often contain more than 1 serving. This example shows that the package contains 8 servings. But the information provided is for only 1 serving.

Look at the amount of fat, especially saturated and trans fat, in each serving.

See how many grams of carbs are in each serving.

You can also see how many grams of Added Sugar the food contains. This is sugar that has been added as the food is made. Try to choose foods with less added sugar.

Decide whether the food fits into your plan.

Tips for dining out with diabetes

- If you don't know what's in a dish or how it's prepared, ask
- Ask for salad dressing, sauces, and gravy on the side
- Estimate your normal portion and put the extra in a container to go
- Try to limit alcohol and sugary drinks, or avoid them
- Don't rush! Eat slowly and really enjoy your meal
