Syphilis Screening	At risk
Chlamydia Infection Screening	Yearly - All ages
Gonorrhea Screening	Yearly - All ages
Hepatitis B & Hepatitis C Screenings	Yearly
Urinalysis	Yearly
Screening for latent tuberculosis infection	At risk

The **SIHO Preventive Health Benefit Guidelines** are developed and periodically reviewed by SIHO's Quality Management Committee, a group of local physicians and health care providers. The QMC reviews routine care services from the American Academy of Family Practice Standards, American College of OB/GYN Standards, Center for Disease Control Recommendations, American Cancer Society Recommendations, American Academy of Pediatric Standards and U.S. Preventive Services Task Force Recommendations.

These recommendations were combined with input from local physicians and the standard Preventive Health Benefit was developed. These standards and recommendations are reviewed every one to two years, and the benefits are updated as needed.

Please note that your physician may recommend additional tests or screenings not included in this benefit. If you receive routine screenings that are not listed in this brochure you may have financial responsibility for those charges.

A screening procedure performed when there is a family history or personal history of a condition (and which does not fall within the listed age/ frequency criteria of the Preventive Health Benefit) will be covered under the major medical benefit.
